THE WHITE HOUSE
WASHINGTON

10/31/69

Need to reserve room for
Friday 11/7 for windup meeting
of Domsat group.

Call Drew and Moore and
Kriegsman and tell them
of the changes -- University
Computing -- also call all
the people on the list and
change on their meeting
notice.

*Call all people (CBS etc)
tell them room #
& ask who is
coming)*

Memorandum for the Domestic Satellite
Working Group Members

The following meetings have been scheduled in Room 272,
Executive Office Building. Would you please let my office
know who will be attending.

Tuesday, November 4

10:45 a.m. COMSAT
2:45 p.m. Columbia Broadcasting System

Wednesday, November 5

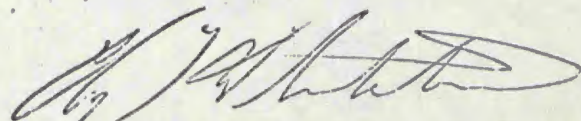

10:45 a.m. Communication Workers of America
2:45 p.m. University Computing Company

Thursday, November 6

2:00 p.m. Working group meeting to wind up
the report

2:45 University

Friday 2pm Windup

Clay T. Whitehead
Staff Assistant

DOMESTIC SATELLITE MEETINGS

Tuesday, November 4, 1969

10:00 a.m. COMSAT

Joseph Charyk, President

2:00 p.m. Columbia Broadcasting System

William Lodge

4:00 p.m. Maximum Service Telecasters

Roy Easley, Asst. Exec. Director

Lester Lindow, Executive Director

Howard Head, Engineering Counsel

Henry Goldberg, one of their legal counsel (Covington
& Burling)

Wednesday, November 5, 1969

10:00 a.m. Communication Workers of America

Joseph Beirne, President

John Morgan

George Miller

Thursday, November 6, 1969

2:00 p.m. University Computing Company

Martin Hoffmann, Assistant General Counsel

Friday, November 7, 1969

2:00 p.m. Windup meeting of Domsat Group

THE WHITE HOUSE

WASHINGTON

August 19, 1969

The Government is considering alternative policies for the timely introduction of satellites to domestic commercial communications. Our objectives are to assure timely and full benefit to the public of satellite technology potentials and to assure maximum learning about the problems and possibilities of satellite services in domestic applications.

We are aware that your organization has had a continuing interest in this subject. While we have reviewed the public record of the last several years, your current ideas and information would be a useful addition to our review. I would, therefore, like to invite you to submit any information or comments you feel would be helpful to our working group. We expect to complete our work about October 1.

Since the Federal Communications Commission is responsible for authorizing specific operational systems, we will not be concerned with specific corporate proposals or the details of system designs. Rather, our focus will be on the economic and institutional structure of the industry, the relationships between competition and regulation, and how new uses and services can be encouraged for public benefit.

Enclosed are some of the issues we will be considering. You may wish to use these, in part, in organizing your comments. I look forward to hearing from you.

Sincerely yours,

Clay T. Whitehead
Staff Assistant

Enclosure

August 16, 1969

Benefit to the public from the economic and
service potential of satellite technology

1. What specific services that are not now available would be made possible and economically feasible through satellite technology?
2. What specific services now being offered could be provided more effectively or more efficiently through satellite technology, and what economic savings would accrue?
3. What institutional, technical, and economic arrangements, taken as a whole, appear most likely to assure full benefit to the public of domestic satellite potential?
4. What specific services and systems appear to offer the most immediate economic potential and how can they best be provided?

Learning about the problems and possibilities
of satellite services

1. What information about technological capabilities and performance of satellite systems is needed to resolve uncertainties about the technical and economic feasibility of potential systems?
2. What information about operational uncertainties is needed?
3. What information about economic and market characteristics is needed?
4. Specifically, what information or technological developments are needed over the next few years with respect to tradeoffs among spectrum utilization, orbit location, and cost to permit maximum utilization of communications satellite capabilities?
5. What of the above information can be obtained best by further research, experimental trials, or a pilot operational system?

Incentives for innovation by communications firms to
develop new telecommunications services and markets

1. What Government policies would be most effective in promoting development of new telecommunications services and markets by the private sector?
2. What research and development can be carried out by private enterprise to speed the development of economically viable domestic communications satellite applications?
3. Is there research that can be carried out only by the Government that would resolve uncertainties or impediments to technological or market innovation by the private sector?
4. Given appropriate economic incentives and institutional arrangements, what new services, markets, or technologies could the private sector likely develop in the foreseeable future?
5. What institutional arrangements with respect to ownership and operation of communications satellites will offer the best balance between the rate of innovation and nondisruptive growth of the communications industry?

Degree of regulatory control and impediments
to technical and market innovation

1. What type and degree of economic regulation (such as rate-base regulation, limits on entry of new firms, authorized user limitations, or limits on services offered) is now clearly necessary during the initial phases of domestic commercial satellite communications? What technical regulation, such as spectrum utilization, interference standards, or service standards?
2. Under reasonable projections of the economic and technological potential of satellite services, what regulatory policies appear most desirable for the long run?
3. Is it desirable to have regulatory policies with respect to telecommunications via satellite that are distinct and different from policies for terrestrial systems?
4. To what extent can competition, together with general regulatory guidelines, foster a more responsive industry than is possible with very detailed regulation?
