REMARKS OF

1

Clay T. Whitehead, Director

Office of Telecommunications Policy Executive Office of the President

before the

Colorado Broadcasters Association 1972 Legislative Dinner

Denver, Colorado

February 17, 1972

From all the reports I've seen, last year was not a great financial success for broadcasting, but it was not as bad as some expected when a future without cigarette billings seemed to be a very bleak future indeed. That's the business side; nothing very exciting in 1971, but the economic prospects look good for the coming year. On the government, or regulatory side, broadcasters were beset by threatening developments at the FCC and in the courts: license renewals, fairness and access, cable television, spectrum reallocations, and children's programming among other issues. But serious as these developments are, they are being over-shadowed by a new problem.

The problem I refer to is the regulation of broadcast advertising and the conditions the advertiser finds when he chooses the broadcast media for his messages. Try this list of issues: advertising and the Fairness Doctrine; mandatory access for editorial ads; advertising in children's programs; licensee responsibility as to false and misleading advertising; campaign spending limits on broadcast ads and political advertising in general; ads for certain types of products; and counter advertising. The nature of commercial broadcasting depends heavily on how these and other similar issues are resolved. What is commonly called "free" broadcasting is actually advertiser-supported broadcasting, and the regulatory framework for broadcast advertising deals with the economic core of our private enterprise broadcast system. Similarly, advertising is now so dependent on broadcasting that the issues faced by the advertising industry have been transformed into broadcast-advertising issues.

Of course, there were ads before there was broadcasting and, of course, many of the ads in the pre-broadcasting days were crude deceptions. Deceptive and misleading advertising is still an important issue, but now the overall issue is much broader than the traditional concerns about questionable advertising. If it were only a case of advertising taste or excessive "puffery," I think most people would take advertising with the proverbial grain of salt that one relied upon in listening to the "medicine men" at country fairs or reading the back pages of comic books and other popular literature. But now broadcasting, especially TV, has raised the advertisement to a popular art form. TV advertising is not only pervasive, it is unavoidable. That special impact that characterizes the television medium provides a natural attraction for the techniques usually associated with advertising. It seems that the TV advertising spot is the most innovative and almost inevitably appealing use of the television medium.

In these circumstances, it seems that advertising itself has become an issue. Some people tend to view it as the means by which an insidious business-advertising complex manipulates the consumer and leads public opinion to goals that are broader than

- 2 -

simply purchasing the products being advertised. Some feel that what is being sold the American people is a consumptionoriented way of life. This becomes a political issue that is a fit subject for government redress--a remedy in addition to the traditional controls on false and misleading advertising.

I think that some of these broader concerns about TV advertising are now motivating the Federal Trade Commission. The FTC filed comments in the FCC's Fairness Doctrine inquiry, proposing that there be compulsory counter advertising for almost all broadcast ads. The FTC's counter advertising proposal would provide an opportunity for any person or group to present views contrary to those raised explicitly and implicitly by product ads. In the Trade Commission's own words, counter advertising "would be an appropriate means of overcoming some of the shortcomings of the FTC's regulatory tools, and a suitable approach to some of the present failings of advertising which are now beyond the FTC's capacity." The Trade Commission wants to shape the Fairness Doctrine into a new tool of advertising regulation and thereby expand the Doctrine's already chaotic enforcement mechanism far beyond what was originally intended and what is now appropriate.

The Trade Commission would have the FCC require responses for four types of ads:

 Those that explicitly raise controversial issues, such as an ad claiming that the Alaska pipeline would be good for caribou;

- 3 -

(2) Those stressing broad, recurring themes that implicitly raise controversial issues, for example, food ads that could be taken as encouraging poor eating habits;

4 -

- (3) Those ads that are supported by scientific premises that are disputed within the scientific community, such as an ad saying that a household cleanser is capable of handling different kinds of cleaning problems; and
- (4) Those ads that are silent about the negative aspects of the products, so that an ad claiming that orange juice is a good source of vitamin C may be countered by a message stating that some people think rose hips are a superior source of that vitamin.

The Trade Commission also suggested that broadcasters should have an affirmative obligation to provide a substantial amount of free air time for anyone wishing to respond to product ads. This goes beyond the requirement in the <u>BEM</u> case that broadcasters must allow persons or groups to purchase time. In a business sense, that is not too intrusive on the broadcasters' operations, and some right to purchase time for the expression of views on issues would serve an important purpose. But a requirement to provide "free" time in response to paid advertising time would have all the undesirable features of any market in which some people pay and some do not. It is, in any event, misleading to call this free time. There would be a hidden subsidy and the public would end up paying for both advertising and counter advertising messages.

Even if there were no problems with a broad free time requirement, we would be critical of the FTC for suggesting that "Fairness" responses be required for ads involving disputes within the scientific community and ads that are silent as to the negative aspects of products.

We all know that, if an advertiser falsely implied that a scientific claim was well established or failed to disclose a material negative aspect of his product, the FTC could use its own procedures to deal with this type of deceptive advertising. The Trade Commission could even use its new corrective advertising weapon, and require the advertiser to clear up misleading claims in past advertising. This is now being done in the Profile Bread ads.

The FTC, however, doesn't think that these regulatory tools are effective enough or thinks that they are too troublesome to apply. It is disturbing, however, that the agency charged with overseeing the content of advertising in all media has stated that the FCC is better able to achieve the Trade Commission's regulatory goals for the broadcast media. Of course, the Trade Commission would like to bring the FCC into the process and by-pass the difficult job

- 5 -

of making factual determinations concerning advertising deception. The FTC is constrained by all sorts of procedures which safeguard the rights of advertisers accused of deception. It is much easier to subject the suspect advertiser to a verbal stoning in the public square, but is it responsible for a government agency to urge this type of approach? This Administration thinks not.

Perhaps private, self-styled spokesmen for the public interest cannot be faulted for advocating compulsory counter advertising without coming to grips with all the complexities and consequences involved. But a regulatory agency cannot afford the private litigant's luxury of dismissing the enormous practical difficulties of its proposal by simply asserting without support that it would be workable. Nor can an agency ignore or dismiss difficult and sensitive First Amendment problems, the underlying economic structure of the industries it is dealing with, or the detailed balancing of competing public interest considerations.

If you have any doubts as to the workability of the FTC's proposals, listen to some typical examples of the type of "negative aspect" counter ads the FTC had in mind.

"In response to advertising for small automobiles, emphasizing the factor of low cost and economy, the public could be informed of the views of some people that such cars are considerably less safe than larger cars. On the other hand, ads for big cars, emphasizing the factors of safety and comfort, could be answered by counter-ads concerning the greater pollution arguably generated by such cars. In response to advertising for some foods, emphasizing various nutritional values and benefits, the public might be informed of the views

- 6 -

of some people that consumption of some other food may be a superior source of the same nutritional values and benefits. In response to advertising for whole life insurance, emphasizing the factor of being a sound 'investment,' the public could be informed of the views of some people that whole life insurance is an unwise expenditure. In response to advertising for some drug products, emphasizing efficacy in curing various ailments, the public could be informed of the views of some people that competing drug products with equivalent efficacy are available in the market at substantially lower prices."

The FTC capped this list of examples -- which related to products that alone account for 40 per cent of all TV advertising -by asserting that "the list could go on indefinitely"! Can the FTC be oblivious to the fact that this is precisely the problem with compulsory counter advertising? Without doubt our overriding goal in this area should be to provide consumers with information that will enable them to make intelligent choices among products. But any broadcast advertisement could start an endless round of debate and disputation based on opinions regarding the products being advertised. This isn't the kind of information that is most helpful to consumers. Although it may seem that the Trade Commission's counter advertising proposal serves consumers' interests, the public would be done a disservice if all that counter advertising achieves is a bewildering clutter of personal opinions thrust before consumers every time they turn on their radios and TVs. And who is supposed to protect the public from false and misleading material in the counterads?

- 7 -

The advertisers will still have the content of their presentations regulated by the Trade Commission to weed out deception, but who is to guard against the excesses of counter advertising by irresponsible or uninformed groups? When this question was raised, the FTC's Director of Consumer Protection indicated that the agency might have to "monitor" counter-ads, but this may become "ticklish" since a First Amendment problem may be involved. Ticklish indeed! One would have hoped that a Federal agency would have been more sensitive to this problem before proposing a requirement of counter advertising.

It is also disturbing to see that the counter advertising position is not unique to the FTC. Others in government seem to be advocating an end to the broadcast ban on cigarette ads just to bring back anti-smoking spots!

The figures show that per capita cigarette consumption in the U. S. decreased when anti-smoking spots were aired in large numbers and increased in 1971, when there were no cigarette ads and a lower level of anti-smoking spots. Bigger increases are predicted for 1972. The Department of Agriculture has attributed the increased consumption to a decrease in antismoking spots. This may indicate that advertisers are better off not using the broadcast media when there is a counter advertising requirement. If the cigarette advertising ban were lifted, the advertisers might well choose not to buy time and, thereby, underwrite the anti-smoking campaign.

- 8 -

Naturally, there would be some who would respond to this public interest crisis by requiring cigarette companies to advertise on radio and TV. Broadcasters wouldn't mind this at all, but if the FTC had its way you would have to require all advertisers to use TV and even the NAB couldn't pull that one off.

This wouldn't be a very constructive approach to advertising's problems, but one is sorely needed. The public expects to see actual and substantial progress made by the advertising industry's belated efforts at self-regulation. Advertising has made significant contributions to our economic well-being and our material worth. But if advertising is to continue to make these contributions it must reassess its role in our society.

We do not want to see advertisers respond to these problems by fleeing the broadcast media either voluntarily or involuntarily. Advertisers might be able to survive without broadcasting, but broadcasting could not survive without advertising. Advertising revenues make possible all of the public service, news, information, and entertainment programs. I do not agree with those who believe that commercial broadcasting is impervious to the adverse economic affects of regulation. You really can kill the goose that lays the golden egg; and it doesn't matter that it's killed by well-intentioned people.

- 9 -

This does not mean that the abuses and excesses of broadcast advertising should not and cannot be prevented. Broadcasters themselves are moving to correct problems in children's advertising and problems with deceptive and offensive ads. The advertising industry itself is following the broadcasters in the essential route of self-regulation. The record of self-regulation has not always been free of problems; and it never will be. Public vigilence is needed too, and the FCC and the Trade Commission have proper roles in seeing to it that that vigilence is maintained effectively.

The FCC has taken an approach that I strongly support. The FCC believes that advertising should be regulated as a business practice by the Trade Commission and this is not the FCC's job. Product ads should not be regulated, TV or not, as expressions of ideological, philosophical or political viewpoints. On the whole the FCC has recognized this and has implemented its regulatory power over broadcast advertising in a reasonable and responsible manner.

In its area of responsibility, the Trade Commission must use its regulatory tools to preclude false and deceptive advertising. The public is entitled to protection from the unethical business practices and from the occasionally misleading hyperbole of advertising agencies. But the FTC's responsibilities should not be expanded to include the responsibility for finding a solution to the philosophical problem that

- 10 -

advertising in general poses for some consumer advocates. I think the FTC realizes that this would be beyond the scope of its regulatory authority; and it should be kept that way. Government agencies must realize that they cannot solve all of society's problems, that the Fairness Doctrine is not a panacea for fairness, much less all of our ills, and that when they go too far with social engineering they do more damage than good.

This Administration does not believe that advertising is inherently evil. We do not believe that advertiser support of commercial broadcasting is polluting the minds of America. This Administration believes in a strong and free private enterprise system of broadcasting for our country and in effective but responsible government. We intend to work to keep it that way.

Mr. Clay T. Whitehead Office of Tele-Communications Policy Washington, D. C.

Dear Tom:

It's just impossible for me to express properly my personal appreciation, and the appreciation of the members of the Colorado Broadcaster's Association, for your tremendous presentation at our winter meeting.

Your common sense approach, to what has to be one of the most ridiculous, yet serious problems ever presented to the broadcast industry, had the effect of reassuring broadcasters and informing legislators.

I'm certain the broadcasters of Colorado are deeply grateful, not only for your approach to this matter, but the nammer in which you have looked at so many other problems facing our industry. If we can ever be of assistance to you, please feel free to call on us.

Again, thank you for being such an important part of our meeting and for bringing common sense back into the bureaucracy through which broadcasters are regulated.

Gratefully,

Joe Tennessen President Colorado Broadcaster's Assoc.

March 8, 1972

Brian Lamb Office of Tele-Communications Policy Washington, D. C.

Dear Brian:

Now that things have slowed down just a bit, I'd like to take the opportunity to thank you for seeing to it that Mr. Whitehead got to our winter meeting.

I know you were instrumental in the development of that exciting speech, which had such universal acceptance nation-wide and which, incidentally, brought some very nice publicity to the Colorado Broadcaster's Association.

I'm certain that you were as aware as I, of the warm reception given Tom by the members of our group. And I'm confident that both you and he would be welcome at any time at any of our meetings. The next one will be in Snowmass-at-Aspen, July 13, 14, and 15. It's a pleasant place for a midsummer vacation.

Gratefully,

Joe Tennessen President Colorado Broadcaster's Assoc.

February 25, 1972

Dr. Clay T. Whitehead Director Office of Telecommunications Policy 1800 G Street N.W. Washington, D. C. 20504

Dear Dr. Whitehead:

Often these days we broadcasters find too few times when a voice speaks words we like to hear. At times, it seems that the fun has gone out of our work.

But your ideas expressed at the Colorado Broadcasters Association meeting last week were certainly appreciated, and did add a fresh note to the situation. For that, I thank you.

It was a privilege meeting you and an honor to introduce you to our members and guests. Your appearance was the highlight of our convention. My thanks to Brian Lamb for his help and courtesies.

Sincerely Lew Birchfiel

Mr. Everett H. Erlick Group Vice President and General Counsel American Broadcasting Companies, Inc. 1330 Avenue of the Americas New York, New York 10019

Dear Ev:

Thank you for your letter of February 18, and for your comments on the speech I made to the Colorado Broadcasters Association.

As you know, I agree with you that the proposed counter advertising policy's impact would be a negative one. I hope that this Offices interest in this area will have the opposite results. I appreciate your taking the time to let me know your thinking on this.

Best regards.

Sincerely,

aigned TOM

Mr. Clay T. Whitehead Director Office of Telecommunications Policy Executive Office of the President Washington, D.C. 20504

Dear Clay:

Just a brief note to tell you how very pleased we were to read your Denver speech. The strong statement on counter commercials was most welcome, particularly so since you made it clear that this reflected the Administration's view.

You correctly evaluated the tremendously destructive impact such a policy would have on the industry and I would hope that this will be a continuing concern of OTP and others in the Administration.

Warmest regards.

部

Sincerely, Everett H. Erlick

REMARKS

Attached reflects my understanding of results of February 18 Boulder trip. Consider it did much good, particularly in increasing Crombie's confidence factor.

Also, you asked me to remind you of "ITU matters" upon our return. Item came up in connection with PSD briefing as to possible activities in international area.

Mell

OFFICE OF TELECOMMUNICATIONS POLICY EXECUTIVE OFFICE OF THE PRESIDENT WASHINGTON, D.C. 20504 February 23, 1972

To: RECORD

From: W. Dean, Jr.

Subject: Visit to ITS Boulder Laboratories on February 18, 1972

On February 18, 1972, Tom Whitehead, Brian Lamb, Walt Hinchman, and Will Dean visited the ITS Laboratories at Boulder, Colorado. The primary purpose of the visit was to learn "first hand" what actions were underway by the ITS organization in support of OTP.

Results of the visit were as follows:

1. Discussions between Tom Whitehead, Walt Hinchman, Doug Crombie (Acting Director of ITS), and the undersigned.

a. Crombie explained that from a budgetary standpoint the ITS efforts could be outlined as follows (dollars in millions):

Budget

Purpose

- 4.2 Support by other agencies, mostly military.
- 1.4 OT efforts.
- .6 EMC/Frequency Management.
- .25 Policy Support Division.
- 6.45 TOTAL

b. Crombie outlined that, in his opinion, the deficiencies

were:

- -- Lack of long-range plan for ITS.
- -- His only guidance was to "develop a good Lab"--whatever that means.
- -- He felt there was a need for greater emphasis on use of the spectrum--with respect to technological and economic efficiencies.

OTP USE ONLY

- -- He felt that the laboratory should be more heavily engaged in analysis of system performance for Government activities such as FTS, GSA, etc.
- -- Tom Whitehead explained that his view of the intended function of ITS could be gathered from the analogy of ITS being the scout, between the explorers (research) and the wagon train (industry), in the area of evaluating telecommunications effectiveness and setting forth alternatives, both economic and technical.
- -- The undersigned suggested that ITS should be viewed not as a normal laboratory but rather as an analytical (technical and economic) interface between R&D and the user/builder.
- -- Crombie emphasized that a greater role should be played by the laboratory in the standards area, not in a regulatory sense but rather designed to help the users.
- -- Crombie also felt that an overall objective should be to reduce "other agency" support.
- -- Crombie stated that as regards PSD there was a lack of definition with respect to specific tasks and lack of ability to stick to tasks once assumed. He emphasized a need for closer cooperation/coordination and pointed to the EMC area as a model for management.

2. Meeting with PSD Personnel.

a. The five "lead" personnel at Boulder assigned to PSD outlined their current efforts--some ten items, including one on spectrum (Item 3). It was pointed out that the PSD expenditures to date were \$145 K, expenditures for the balance of FY 72 are expected to amount to \$164 K, for a total of \$309 K. It was also pointed out that ITS support of PSD was in the amount of \$44 K expenditure to date, an additional \$206 K to \$444 K for the balance of 72, for an expected total of \$250K. The total effort would then be \$309 K plus \$250 K or \$559 K.

b. With respect to the spectrum item (3), it was pointed out that the Boulder PSD activity was running in the amount of \$52 K expended to date with ITS support in the amount of \$7 K totalling \$59 K. Expected expenditures for the balance of 72 by BPSD were in the amount of \$45 K and ITS \$58 K for a total of \$103 K for the balance of 72 or total for the year with respect to the spectrum area of \$162 K. The BPSD personnel gave a brief rundown of their respective actions on the spectrum matter. They are engaged in trying to define spectrum rights and quantify in some manner space assigned versus space available. It was also noted that they have initiated a study of geostationary spectrum resource, with a view to defining the value and possibly renting the resource.

-3-

3. <u>Discussions between Crombie/Dean</u>. During private discussions with Mr. Crombie the following points were emphasized:

a. John Murray as possible head for Boulder activities in EMC. Favorable endorsement given by the undersigned and Crombie will follow through.

b. Pointed out the CAS vs. Altimeter was again a "front burner" item and that they should plan for speedy action with respect to the revised McDonnell-Douglas application.

c. The new procedure with respect to progress reporting, which will be implemented at the next OTP/OT meeting, was discussed and Crombie was encouraged to insure that ITS personnel were prepared.

d. Crombie agreed wholeheartedly that somehow standards and the economics involved in the use of the spectrum must be melded so as to make this a more meaningful subject and self-regulating, if at all possible.

e. Reapportionment. The undersigned outlined the reapportionment for items in support of Frequency Management as follows:

f. Planning. It was emphasized that at the next OTP/OT meeting on March 8 would be dedicated principally to brainstorming future planning in the frequency management support area.

g. The matter of education was touched on briefly and Cromble indicated that Bill Utlaut, Deputy Director ITS, was taking a more active interest in this matter.

h. On the Equipment Characteristics File--Dean and Crombie had an extensive discussion, the summation of which points to the need for very careful deliberation before we launch into an extensive ECF collection effort. This item will be dealt with further at the OTP/OT meeting in March.

With Dean, Jr.

Speech Japan

February 15, 1972

Mr. Lee Bishop General Manager Oregon Association of Broadcasters 210 Allen Hall Post Office Box 3025 Eugene, Oregon 97403

Dear Mr. Eishop:

Since Mr. Whitehead is out of town, he has asked me to reply to your letter of February 10 concerning arrangements for Mr. Whitehead's speech at the OAB Banquet, May 11.

First of all, I enclose for you, as you requested, a copy of Mr. Whitehead's biography, and a glossy photograph of him.

We appreciate your offer of transportation and rooms at the Inn at Spanish Head, and will be in touch as soon as plans become less tencative. I know Mr. Whitehead will be very tempted by the offer of salmon fishing - it certainly sounds great.

If there's anything else I can do, please don't hestitate to let me know.

Sincerely,

Linda K. Smith Special Assistant to the Director

OREGON ASSOCIATION OF BROADCASTERS

Post Office Box 3025

Eugene, Oregon 97403

February 10, 1972

Mr. Clay T. Whitehead Director Office of Telecommunications Policy Executive Office of the President Washington, D.C. 20504

Dear Mr. Whitehead:

210 Allen Hall

Welcome to Oregon!

We were delighted to receive your letter of confirmation: Principal speaker at OAB banquet, 7:30 P.M., Thursday, May 11, 1972, at The Inn at Spanish Head, Lincoln City, Oregon.

Of course, we would hope you could remain over, for some of our sessions on Friday, May 12.

Would you have time to do some deep sea fishing? Our Host Committee would be happy to arrange a charter trip for salmon fishing. Just let us know.

About transportation, to and from the Portland airport. Let us know your arrival and departure times from the Portland airport, and the Host Committee will provide transportation to and from Lincoln City.

A complimentary room at The Inn is being reserved for you. Just let us know your arrival and departure times and days.

Please send us Bio and glossy.

Your visit to Oregon should prove most worthwhile, and too, we hope, pleasant.

Lee Bishop General Manager

Subject: Trip to Boulder

Pursuant to discussion at February 7 staff meeting, I contacted Doug Crombie and set up an appointment with him for 9:30 on February 18. The stated purpose of the meeting is to discuss matters pertaining to the joint OTP/OT electromagnetic compatibility analysis program. I asked Doug to treat this meeting on a low key as it would be better if OTP personnel met privately with the Acting Director of ITS.

I plan to proceed to Boulder on the evening of the 17th and return to Washington on a 3:50 flight on the afternoon of the 18th.

Dear Mr. Peterson:

Thank you for your letter of January 27 discussing arrangements for the Colorado Broadcasters Association Legislative Dinner on February 17.

I doubt very much whether it will be possible for me to send you an advance copy of my remarks, but should there be one available, I will do so. I am enclosing for you a copy of my biography, as you requested.

Your offer to make arrangements for a press conference is most thoughtful. My Assistant for Media and Congressional Relations, Mr. Brian P. Lamb, would be delighted to assist you with whatever arrangements are necessary.

Thank you for your help. I look forward to meeting you on the 17th.

Sincerely,

Ch mit

Mr. Clay T. Whitehead Director Office of Telecommunications Policy Executive Office of the President Washington, D. C. 20504

Dear Mr. Whitehead:

In order that we may provide the best possible coverage for your Denver speaking engagement, it would be helpful if we may have an advance copy of your address before the Colorado Broadcasters Association on February 17th, if one will be available.

We will duplicate and have copies made available to the news media. However, if you plan to have your own office duplicate and distribute, then I would appreciate receiving a dozen copies.

A biographical sketch of yourself also would be useful.

We will call your office a few days before your arrival to see if we may set up a news conference for you, either before or after your speech.

Many thanks for your help.

Sincerely yours,

Sheldon Peterson

The Honorable Clay "Tom" Whitehead Office of Telecommunications Policy Executive Office of The President Washington, D.C. 20504

Dear Tom:

Our informal aggregate known as the Denver Cable Club extends this invitation to you to attend our February get together. The Cable Club is a purely informal luncheon meeting which brings together the many cable television executives in the Denver area, as well as others from surrounding states.

The February luncheon will be held on the 17th at the Playboy Club located in the Radisson Hotel, 1790 Grant, starting at 11:30 (lunch served at 12:15).

National Cable Television Association Chairman John Gwin will be receiving his <u>CATV</u> Magazine "Man of the Year" award at the luncheon. We invite you to make any informal comments you might wish.

If you will let us know when you will arrive at Denver's Stapleton Airport, we would be happy to meet you and provide transportation. And, if time allow, we invite you to join us for a day of skiing at one of Colorado's famous ski resorts (with dry Colorado powder snow!).

Best regards,

Robert A. Searle Publisher

January 5, 1972

Mr. Roger P. Brandt Convention Chairman Colorado Broadcasters Association Post Office Box 18600 Denver, Colorado 80218

Dear Mr. Brandt:

Thank you for the invitation to address the Colorado Broadcasters Association 1972 Legislative dinner on Thursday, February 17.

I am pleased that I will be able to accept your invitation, and I am glad to have this opportunity to meet and exchange views with the Colorado Broadcasters. I'm sure that if there are any details to be ironed out, my Assistant for Press and Media Relations, Brian Lamb, will be in touch with you.

I look forward to seeing you on the 17th.

Sincerely,

states

Invitation to Speak to the Colorado Broadcasters Association

2/17/72

You have been invited to address the Colorado Broadcasters Association 1972 Legislative Dinner, to be held in Denver on Thursday, February 17th.

The dinner is the first night of the CBA Annual Winter Convention, and is a semi-annual event turned annual. It will be attended by 300 broadcasters, state legislators, and by both senators and at least one of Colorado's three congressmen.

You would speak for 40 minutes on a topic of your own choosing and could take Q & A if you want. They would like you to pitch your remarks to the legislators. Last year's speaker was Dr. Albert Burks of "Probe," but this year the dinner is larger and more important.

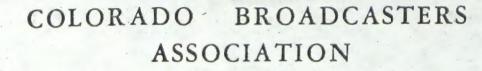

The dinner is given a lot of promotion, and we therefore must let them know next week.

Brian and I both feel you should try to go if it will not interfere toomuch with your speech to the Conference Board in New York on February 15th.

cc: Mr. Lamb

Dear Mr. Whitehead:

Next February in Denver the Colorado Broadcasters Association meets in its Annual Winter Convention to examine the state of broadcasting and the future as we see it. The new concepts and ideas you have presented certainly are a big part of our industry today and tomorrow. With that in mind we would like to have you speak to our convention. A part of our annual winter session is the Legislative Dinner for our state and national legislators. We feel you would be the right man to address our 1972 Legislative Dinner.

This next year's Legislative Dinner will be held Thursday, February 17, beginning at 6:30 P.M. We would be honored if you could join us.

If you have any further questions, please let me know.
